ABS WITH EBD FOR CONTROLLED BRAKING

*Available on GA & GL models only

ESP***

Maintain control of your Ertiga in any driving condition. ESP is a computer-controlled braking system that maintains traction on the road by controlling individual wheels. ESP enhances safety in slippery road conditions and during sudden, harsh and evasive steering manoeuvres.

***ESP is a registered trademark of Daimler AG.

All-in power

The Ertiga's competent 1.5-litre engine with fuel consumption of only 6.2 litres per 100km, is one of the most fuel-efficient people-carriers in its class. Once you are on the road in the Ertiga, the responsiveness of the engine will ensure your journey is a pleasure from start to finish.

NEW-GENERATION HEARTECT PLATFORM

The Ertiga's light, continuous frame efficiently absorbs and disperses energy in the event of a collision. Besides greater safety, the HEARTECT frame also contributes to lower fuel consumption and higher driving performance.
